

## Grade 9 Applied Mathematics Summer Learning Institute

---

*For the past two years, the OAME and OMCA have collaborated on a research project with the University of Ottawa to pilot and document the implementation of Grade 9 Applied Mathematics through school teams in nine different school boards. The school teams are focused on enhancing their understanding of the Grade 9 Applied Mathematics curriculum and implementing the curriculum in ways that best meet the needs of their students. At this Summer Learning Institute on Grade 9 Applied Mathematics the school teams and the research team will share their learning and facilitate a co-planning process encouraging schools to begin their own journey of deeper implementation of the curriculum. The forum will provide a variety of plenary, workshop, and working group sessions.*

---

Schools, in publicly-funded Ontario Boards of Education, where Grade 9 applied mathematics courses are offered are invited to apply to send a [four-person team](#) for this August 2016 learning and planning opportunity.
