Memorial Avenue, Orillia
Room A101

Bracebridge

111 Wellington St, Bracebridge
Room M125

Intended Audience: All Teachers with an interest in Math

Cost: \$15 (Dinner Included!)

Talking Math with Your Kids

Christopher Danielson joins us virtually from St. Paul, MN. He is dedicated to helping parents and teachers support children's mathematical development. Christopher's talk will explore how teachers can use talk to help make student thinking visible. He will also introduce us to an online game/activity that gets kids talking!

Using Desmos in a Classroom

The Desmos team says: "we imagine a world of universal math literacy, where no student thinks that math is too hard or too dull to pursue. We believe the key is learning by doing. When learning becomes a journey of exploration and discovery, anyone can understand – and enjoy! – math." Here is your chance to explore what Desmos can offer your class.

Google Apps for Education

Experience a math activity in Slides and try virtual feedback.
