

Quinte St. Lawrence Mathematics Association

Fall Mini Conference

Thursday, November 13, 2003 4:30 – 6:00

Faculty of Education, Queen's University

Workshop A Senior:	**Title: Using the Internet in Mathematics or Other Courses** **Presenter: Gary Greer** The session looks at ways the Internet can be used for curricular enhancement as well as class management. The approach is more applied than theoretical with examples that most teachers should be able to relate to. You don't need to be an Internet expert to get the advantages of the World Wide Web. There are some simple approaches that we can all benefit from. The entire presentation will be posted on the web for future reference.
Workshop B Intermediate Senior	**Title:GSP4: New and greatly improved Geometer's Sketchpad for High School Math** **Presenter: Robert Sherk** This session will cover all the improvements in GSP so that you can use this powerful teaching and investigative software tool for teaching everything from stat plots and curve fitting to calculus and senior geometry.
Workshop C Intermediate Senior	**Title: Success for All in the Essential and Workplace Math Courses** **Presenter: Shirley Scott** We will look at strategies for success for our students and teachers in these courses. We will explore available resources and look at the role played by technology. Bring your concerns and questions.
Workshop D Junior Intermediate	**Title: Connecting The 'Dots' with GSP4: Grade 4-8** **Presenter: William French** We will look at how exploring with geometry and measurement using GSP4 is a totally new approach to help reach our students. We know that all lines are made up of an infinite number of 'dots', and thus, in Grades 4-8, these are the first steps of appreciating geometry - both in two dimension and three dimension.
Workshop E Primary:	Title: Early Math Strategy - An overview Presenters: Michael Arsenault & Michele McGrath This session will give a quick overview of the Ministry's Early Mathematics strategy and the big ideas of Number Sense and Numeration. We will then take a detailed look at all the things you can do in your classroom with counting.

Cost Teacher Candidates $5.00
OAME/QSLMA members $10,
Others $15.00

To register, please complete the form below, attach a cheque and mail to:

Tom Chapman
22 Bernice Crt
Belleville, Ontario
