Survival Guide Outline:

A survival guide can be completed at the end of each unit, or mid-way through the course as part of a summative assessment.

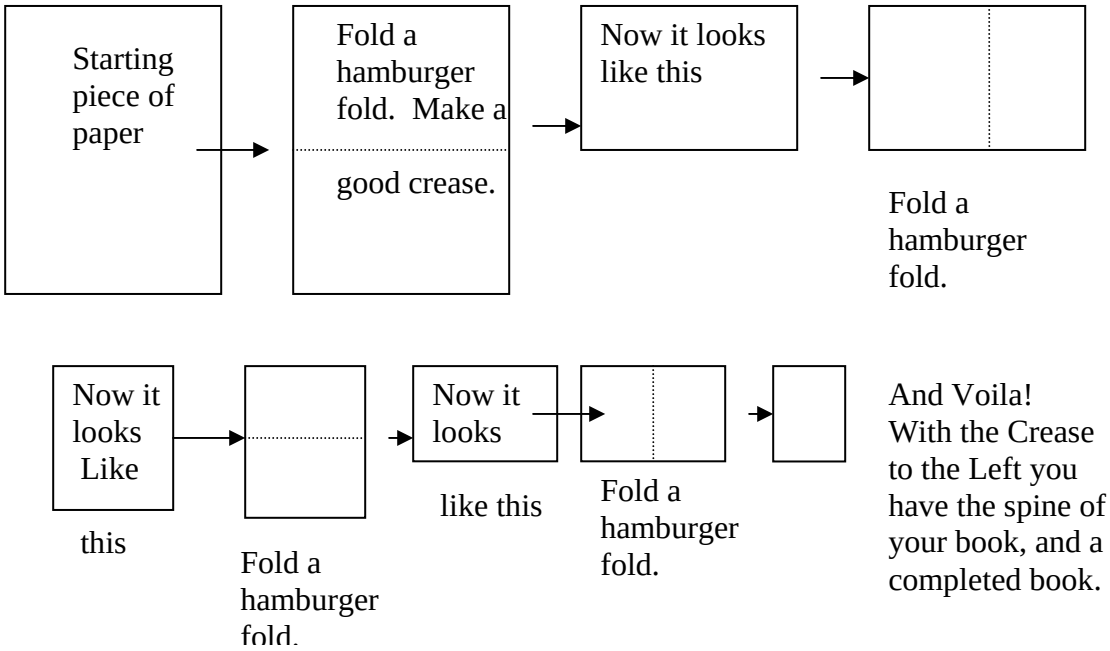

Each unit contains the following:

- definitions from the unit
- methods/procedures
- a worked out example for each method/procedure
- note: a good way to decide how many parts belong in each unit is to look at the number of headings the students have in their notes.
- An extension – that says how the unit is related to real life

The scaffolding that is required for the survival guide will depend on each class. For example I complete the first two units fully with a grade 9 class, and then give them the outline of the concepts that need to be included. While grade 11's and 12's are merely shown examples of survival guides and given the unit outline (the first few units only)

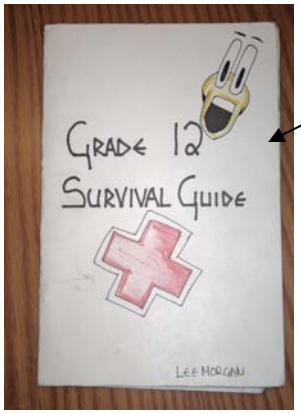

You can use a Bristol board cover. Glue the marking rubric to the inside cover. There are many ways to contain the information in a survival guide. The current elementary schools complete a concept book. You could also just cut a scribbler note book in half width wise and each student gets one-half of the book. You could also use one large piece of chart paper for each student. The chart paper measures roughly 60 cm by 90 cm.

How to Fold the Booklet:

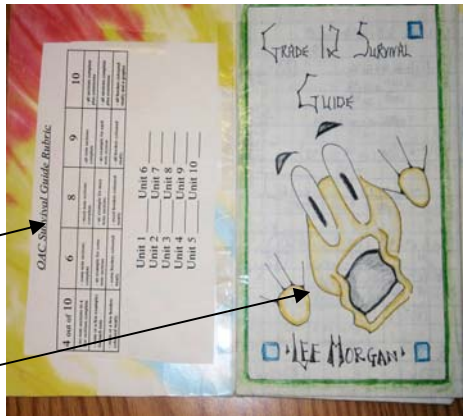

Glue the back of the folded sheet into the Bristol board cover. As long as all of the students fold the survival guide in the same manner, teacher sanity will be saved in the marking.

Bristol Board Cover can be decorated.

Marking Rubric is Glued to inside cover. Inside title page of book can be decorated.

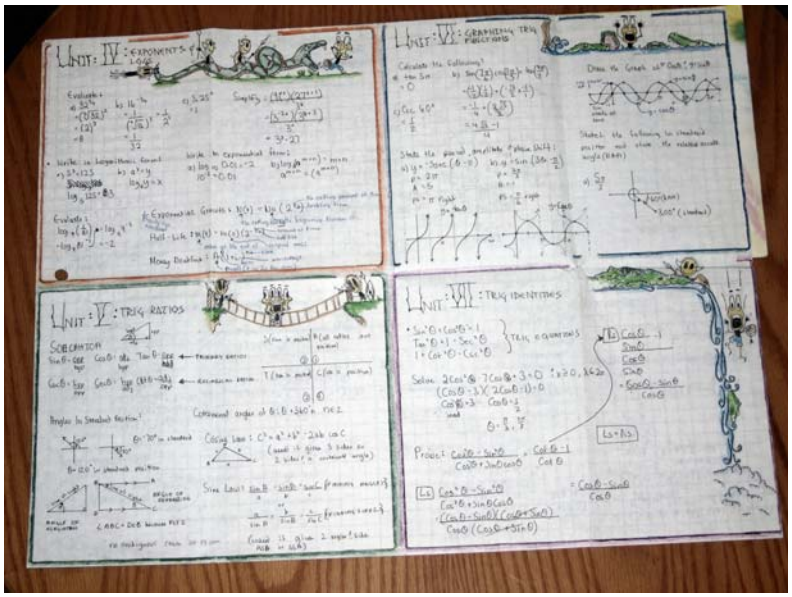

Open the front fold of the book to put in Unit 1 Summary Material.

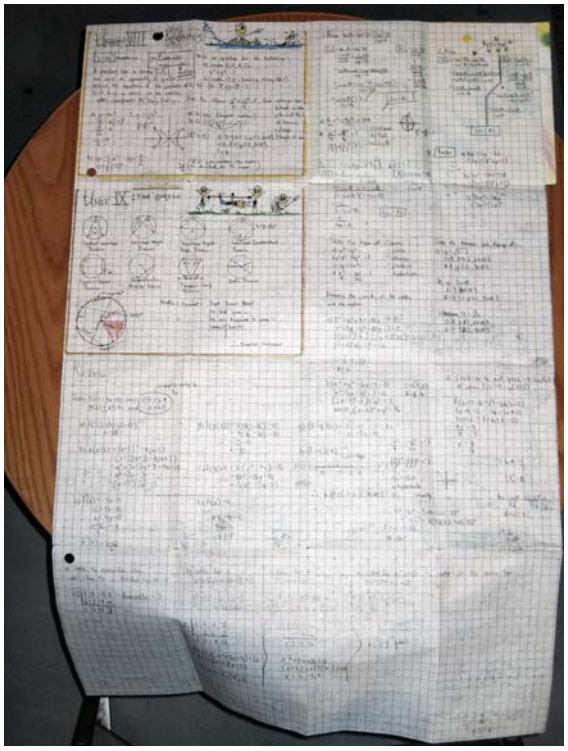

Unfold your page again to expose units 2 and 3. Notice the borders around each of the units.

Unfold your book again and expose units 4, 5, 6 and 7

The final unfolding exposes your final units, plus any exam review that you cover.

Survival Guide Sample Marking Rubric

Level 4	Level 3	Level 2	Level 1	Level R
All note sections complete plus extensions	All note sections complete	Most note sections complete	Some note sections complete	None or 1 note section complete
All examples complete plus extensions	An example for each note section	An example for most note sections	An example for some note sections	None or 1 example for some note sections
All borders coloured neatly and a graphic	All borders coloured neatly	Most borders coloured neatly	Some borders coloured neatly	No borders coloured
